Treasure Hunts

The Challenge

A treasure chest has been discovered! It's heavy and it's sealed with a combination lock.

Can anyone discover the correct numbers for the lock?
Even with the numbers will anyone be able to crack the mysterious code that tells how to open it?

Competitors, usually playing in small teams, are provided with a set of clues which, if solved correctly, will reveal the all important combination number. A deadline is set, by which time all the clues must be solved.

The hunt begins.

Some of the clues are soon solved; others prove much more tricky. There is no room for mistakes if the treasure is to be won.

Teams return with their answers as the deadline approaches. Answers are ready and there is confidence in the air. The excitement mounts.

But wait.

A mysterious kryptic code has to be correctly applied to open the lock.

With all eyes on the chest, the first team tries to crack this final brain teaser.

They are confused, they guess. And the lock stays tightly shut.

Obviously, this treasure chest is not going to reveal its bounty that easily.

The next team try.

Yes? No?

Rest assured, someone will finally crack it and the treasure within will be theirs to enjoy.

All hunts are fully supervised and professionally presented.
They are perfect for all group sizes.
